Software Engineer | Computer Scientist | Full-Stack Developer

PROFESSIONAL SUMMARY

I am a Full-Stack Engineer with 3 years of experience taking products from idea to production across SaaS, marketplaces and AI tools. I build with Next.js, TypeScript and the MERN stack (MongoDB, Express.js, React, Node.js), alongside PostgreSQL, Supabase and Python. I deploy containerized services with Docker and Kubernetes, automate releases through GitHub Actions CI/CD, and work across AWS and Google Cloud, with a strong focus on Clean Code and Clean Architecture.

WORK EXPERIENCE

Software Engineer — Bitsmiths Studio

Jul 2025 – Present

- **Multi-Seller E-Commerce Marketplace** — (<https://anina.app>)
Built a multi-tenant marketplace with Next.js, TypeScript and Supabase, adding row-level data isolation, automated Stripe Connect payouts and DHL tracking, increasing engagement by 40% and reducing support tickets by 70%.
- **Off-Campus Rental Marketplace** — (<https://unibid.app>)
Designed a live bidding system with Next.js, Supabase and WebSockets, using server-side serialized bid acceptance to handle 1,000+ concurrent users with sub-200ms updates and zero conflicts.
- **Real Estate Investment Platform** — (<https://vestafi.co>)
Built a fractional property investment platform for East Africa with Next.js, TypeScript and Supabase, letting investors buy property shares, track holdings in a digital wallet and receive automated rent payouts.
- **Human Resource Management System** — (<https://team.bitsmiths.studio>)
Unified onboarding, leave, medical claims, overtime and monthly payroll in one Next.js and Supabase platform, with four-layer access control and 12 automated email workflows replacing manual HR processes.
- **AI SEO Automation Platform** — (<https://seomaven.ai>)
Built an end-to-end Next.js platform replacing five separate tools for keyword research, AI content generation and rank tracking, with 3x lower cost per article and 50% lower keyword-tracking cost.
- **Bitsmiths Studio Website** — (<https://bitsmiths.studio>)
Built the company website in Next.js and TypeScript with responsive UI, SEO and performance optimization.
- **Feinwerks Studio Website** — (<https://feinwerks.software>)
Built the website for Feinwerks, a Germany-based product engineering studio, in Next.js and TypeScript with SEO and performance optimization.

Software Engineer — New Web Order

May 2025 – Jul 2025

- **Company Website** — (<https://www.newweborder.co>)
Built and optimized a corporate website using Next.js, TypeScript, and Tailwind CSS, improving page performance by 40% through frontend optimization techniques and SEO restructuring.

Full-Stack Developer — Genesys Research Lab (Apprenticeship)

Jul 2024 – May 2025

- **PhysioVision — Real-Time Human Pose Estimation for Adaptive Physiotherapy**
Designed a real-time computer vision pipeline with MediaPipe and OpenCV and a retrieval-augmented language model

that turns joint trajectories into context-aware physiotherapy feedback, achieving ~95% joint detection accuracy under real-time constraints.

Software Engineer — Aawaz AI

Jun 2023 – Aug 2024

- **BankIslami PEP Risk Intelligence System**
Built an NLP-powered news scraping and risk-ranking system to assess reputational and regulatory risk for Politically Exposed Persons (PEPs); enabled automated compliance monitoring for a banking client.

Software Engineer — IntegralX

Oct 2023 – May 2024

- **SnobBots — Multi-Tenant AI Support Agent Platform**
Built a MERN-based platform where resellers provision isolated, RAG-grounded AI support agents in bulk, with per-tenant Pinecone partitioning so retrieval never crosses shops.

TECH STACK

- **Languages & Frameworks:** TypeScript, JavaScript, Python, SQL, React, Next.js, FastAPI, Tailwind CSS
- **Backend & Databases:** Node.js, MERN Stack, REST APIs, MySQL, PostgreSQL, MongoDB, Supabase, Firebase, Pinecone
- **Cloud & Deployment:** Docker, Kubernetes, AWS, Google Cloud, Azure, Vercel, Coolify, Render
- **Automation & DevOps:** GitHub Actions CI/CD, Git, n8n, Trigger.dev
- **Generative AI:** LangGraph, LangChain, OpenAI API, Anthropic Claude API, RAG Pipelines, Multi-Agent Systems
- **Payments & Third-Party APIs:** Stripe, PayPal, OpenRouter, DataForSEO, Google Maps API

EDUCATION

Bachelor of Science in Computer Science

Sep 2021 – Jun 2025

FAST NUCES, Islamabad, Pakistan

- **Dean's List: Semesters 7 & 8** (top academic performer in final year AI & ML coursework)
- **Key Subjects:** Data Structures & Algorithms, Algorithm Design & Analysis, Database Systems, Operating Systems, Computer Networks, Artificial Intelligence, Software Engineering, Information Security, Cloud Computing.

CERTIFICATES

- AWS Academy Graduate — [Cloud Web Application Builder](#) (Dec 2024)
- AWS Academy Graduate — [Cloud Data Pipeline Builder](#) (Dec 2024)
- AWS Academy Graduate — [Cloud Foundations](#) (Dec 2024)

EXTRACURRICULAR AND LEADERSHIP

- **Technical Vice Head, Google Developer Student Club (GDSC):** Led and mentored a 10-member Platform Development team; guided development of a vocal aid system for hearing-impaired individuals.
- **Operations Specialist, TEDx FAST NUCES:** Organized one of the university's largest annual events with approximately 5,000 attendees.
